Product Info

dental health

1. Protein : chicken.
2. Improves oral hygiene > vitamin C, mint and parsley.
3. Fights oral bacteria and tartar > sodium hexametaphosphate.

The DENTAL HEALTH formula can be fed regularly or combined with the usual formula, to boost oral hygiene... and overall health!

The friction obtained while chewing the kibbles reduces plaque and tartar build-up along the gum line, lowering the risk of tooth decay or gum disease.

DENTA +

helps maintain fresh breath
and good oral hygiene

KIBBLE SIZE / BRUSHING EFFECT

reduces plaque and tartar build-up
